## Table of contents

**1. This material is about learning how to use VVVV ..... 5**

**2. User interface, language, menu system, the Inspektor and the use of help files 23**

2.1. First steps, installation and useful tips..... 23

2.2. The interface..... 26

**3. Message types, inlets and outlets..... 31**

**4. Saving and loading complex mathematical equations ..... 37**

**5. Rendering types ..... 47**

**6. Layers..... 53**

**7. Rendering 3D Objects..... 61**

**8. Transformation and grouping..... 67**

**9. Effects and Plug-ins ..... 77**

**10. Audio Analysis..... 86**

**11. Video and tracking..... 92**

**12. External controllers ..... 103**

**13. Arduino and some basic electronics..... 114**

**14. Communication between computers and different control methods ..... 132**

**15. User interface design ..... 147**
